

Bernd Witzel – Publications

MARCEAU C, THOMAS S, KASSIMI Y, GINGRAS G et WITZEL B (2015). «Second-harmonic frequency-resolved optical gating covering two and a half optical octaves using a single spectrometer», <i>Applied Physics B-Lasers and Optics</i> , vol. 119, no 2, p. 339345
WITZEL B , MARCEAU C, THOMAS S, KASSIMI Y et GINGRAS G (2014). «Infrared pulse characterization using four-wave mixing inside a few cycle pulse filament in air», <i>Applied Physics Letters</i> , vol. 104, no 051122
WITZEL B , MARCEAU C, THOMAS S, GINGRAS G et KASSIMI Y (2014). «Energy-phase coupling inside sapphire-based f-2f nonlinear interferometers from 800 to 1940 nm», <i>Applied Optics</i> , vol. 53, no 898
MARCEAU C, BAH ST, GINGRAS G, WITZEL B et VALLÉE R (2014). «Femtosecond laser pulse compression using angle of incidence optimization of chirped mirrors», <i>Laser Physics Letters</i> , vol. 11, no 065302
MARCEAU C, GINGRAS G et WITZEL B (2013). «Excitation with effective sub-cycle laser pulses», <i>Physical Review Letters</i> , vol. 111, no 203005
WITZEL B , MARCEAU C et GINGRAS G (2011). «Continuously adjustable gate width setup for attosecond polarization gating: theory and experiment», <i>Optics Express</i> , vol. 19, p. 3576-3591
GINGRAS G, TRIPATHI A et WITZEL B (2009). «Wavelength and intensity dependence of short pulse laser xenon double ionization», <i>Physical Review Letters</i> , vol. 103, p. 173001
SUDMEYER T, MARCHESE S, HASHIMOTO S, BAER C, GINGRAS G, WITZEL B et KELLER U (2008). «Femtosecond laser oscillators for high-field science», <i>Nature Photonics</i> , vol. 2, p. 599
WITZEL B et al. (2008). «Femtosecond thin disk lasers with $>10^7$ J pulse energy for high field physics at multi-megahertz repetition», dans <i>Ultrafast Phenomena 2008 (UP 2008)</i>
WITZEL B et al. (2008). «Femtosecond thin disk lasers exceed pulse energies of 10 microjoules and enable high field physics experiments», dans <i>Advanced Solid-State Photonics (ASSP '08)</i>
SUDMEYER T, MARCHESE S, HASHIMOTO S, KELLER U, LÉPINE G, GINGRAS G et WITZEL B (2007). «High energy and high repetition rate diode-pumped solid-state oscillator enhances high-field physics measurements», dans <i>Conference on Lasers and Electro-Optics/Quantum Electronics and Laser Science Conference</i> , p. 576-577
GINGRAS G, LÉPINE G et WITZEL B (2006). <i>Wavelength dependent double ionization of Xenon</i>
KAMINSKI P, WIEHLE R, KAMKE W, HELM H et WITZEL B (2006). «Wavelength dependence of double ionization of xenon in a strong laser field», <i>Physical Review A</i> , vol. 73, p. 013413
KAMINSKI P, WIEHLE R, RENARD V, KAZMIERCZAK A, LAVOREL B, FAUCHER O et WITZEL B (2004). «Wavelength dependence of multiphoton ionization of xenon», <i>Physical Review A</i> , vol. 70, p. 053413
